# Appendix A

## ■ Special Cable

Special cable is only used for sample testing and debugging, and it will not be sent to the end user.

## ■ How to install the power supply with standard cable

1. Solder a power jack to 8 pin standard cable, and then connect to a 12V1A power adapter

Note: If you need to use this method, we can help to provide this type cable soldered with a power jack, see below picture.

2. Directly connect 8 pin cable to a power supply
